

Vulnerability Assessment Workshop: Day Two

Day Two – Agenda Overview

- **Morning** – Species vulnerability assessment
- **Late morning** – Continue intro to human, economic and ecosystem services
- **Afternoon** – Human, economic and ecosystem services discussion and vulnerability assessment
- **Late afternoon** – Wrap up

Species Vulnerability Assessment

Morning Effort:

- Choose a group:
 - (1) Vegetation, (2) Wildlife, or (3) Aquatic Species
- Within your group:
 - Discuss whether species is captured by coarse filter vulnerability assessment
 - Select species to assess and document *why* you chose to address species
 - Complete worksheets on sensitivity and exposure, and adaptive capacity
 - Discuss overall vulnerability

Resource list

Vegetation Species

- Camas
- Tufted hairgrass
- Whitebark pine
- Spruce fir forest community
- Ponderosa pine
- Western larch
- Western white pine
- Grand fir/cedar/hemlock community
- Douglas fir
- Red alder
- Deerfern
- Idaho fescue

Wildlife Species

- Canada lynx
- Wolverine
- Pika
- Mountain goat
- White-headed woodpecker

Aquatic Species

- Westslope cutthroat trout
- Steelhead trout
- Fall and Spring Chinook salmon
- Sockeye salmon
- Bull trout
- Cutthroat trout
- Interior redband trout
- Pacific lamprey
- Western pearlshell mussel
- Giant salamander
- Coeur d'Alene salamander

Overall process
