# Making Your Work Climate Savvy

| 1. What is the goal of your work or organization? *What are you trying to do?* | 2. How are you trying to achieve this goal? *(Strategies, approaches, activities)* | 3. How might climate change undermine or strengthen your existing work?  
*You can use:*  
- the *Climate Impact Worksheet*  
- VA Quick Guide  
- Consider Climate Change and Adaptation (p. 5)  
- Workbook (p. 3 & 4)  
- Fact Sheets | 4. What can you do to increase your likelihood of success given these climate change effects?  
*You can use:*  
- $V=E+S-AC$  
- 5 Tenets |

---

**Exercise 2**
### Making Your Work Climate Savvy

<table>

**Exercise 2**
How is your work vulnerable?

• Physical changes?
• Ecological changes?
• Human responses?
• Interacting effects?

**Exercise 2**
Packing for Uncertainty

Questions you ask before you pack:

• How long am I going?
• What will the weather be like?
• What do I plan to do and what will I need to do it?
• How big is my bag?
• Do I need to carry it?
Planning for Uncertainty

Questions you ask before you plan:

• How long do I need to plan for?
• How will the climate change over that time?
• What do I want my actions to be able to achieve and what do I need to do to help make that still possible?
• Can I link to others?
• Can I carry it out?
Uncertainty doesn’t mean a game of chance

Uncertainty means we plan for likely potentialities
