

Creating Climate-Informed Natural Resource Management Projects in Salmon Valley, Idaho

Thursday, July 30, 2015

2–5pm

Location:

Workshop Objectives

1. Present information on climate changes and impacts for natural resources of Salmon Valley.
2. Provide an overview of climate change adaptation, including case studies demonstrating adaptation in action.
3. Evaluate potential vulnerabilities of current natural resource management projects to climate change.
4. Collaboratively identify climate adaptation options for reducing vulnerabilities of current projects.
5. Provide support, training, and tools for participants to act on climate change.

Schedule

- | | |
|-----------|---|
| 2:00-2:10 | Welcome and overview of afternoon activities. Jessi Kershner, EcoAdapt |
| 2:10-2:25 | Climate change impacts on natural resources of the region. Alex Score, EcoAdapt |
| 2:25-2:40 | Introduction to climate change adaptation. Jessi Kershner, EcoAdapt |
| 2:40-3:10 | Activity 1: Evaluating vulnerability of current projects and activities |
| 3:10-3:20 | Break (snacks provided) |
| 3:20-4:20 | Activity 2: Adapting existing projects and activities to reduce climate risks/vulnerabilities |
| 4:20-4:50 | Group report back and discussion |
| 4:50-5:00 | Wrap-up and next steps. Gina Knudson, Salmon Valley Stewardship and Jessi Kershner, EcoAdapt |
